**Substance Misuse Action Team  
3 Year Annual Rolling Plan  
(2009/10-2011/12)**

**April 2009**

---

## Introduction

People who misuse alcohol, drugs and other substances do considerable harm to themselves, their family and friends and to society in general. The cost of this harm can be measured through inequalities in health and wellbeing for both individuals and communities.

The Gwynedd Substance Misuse Action Team (SMAT) is a statutory partnership, it consists of a number of organisations, including the Local Authority, Police, Fire Service, Local Health Board, Probation, Youth Justice Service, service providers and others. These organisations come together to formulate and implement this three year annual rolling plan. The Partnership receives a grant from the Welsh Assembly Government which is used to commission appropriate treatment, and prevention services.

In Accordance with The Welsh Assembly Government's Substance Misuse Strategy for Wales 2008 – 2018 “Working Together to Reduce Harm”, Gwynedd SMAT have produced a plan, which compliments and adds to the existing work of the individual partners in getting to grips with the problem of substance misuse in Gwynedd.

The plan lists the teams' work in four specific action areas, which are:

### **Action area 1 - Preventing Harm**

This action area aims to help children, young people and adults resist or reduce substance misuse by providing information which informs them of the damage that substance misuse can cause to their health, their families and the wider community (This includes delaying the age that children and young people start drinking).It also includes action to identify people at risk of substance misuse and/or in need of support and signposting to further information, support or diversion activities.

### **Action Area 2 - Support for Substance Misusers**

This action area is aimed at enabling, encouraging and supporting substance misusers to reduce the harm they are causing themselves, their families and communities and ultimately return to a life free from dependant or harmful use of drugs or alcohol. It addresses the provision of support for substance misusers from basic harm minimisation and other advice; outreach and other services aimed at engaging individuals in

treatment; the recognised four tiers of service provision and relapse prevention. It also covers the wider needs of substance misusers for wrap around support services aimed at helping substance misusers access accommodation, education, employment and training – all of which are essential to assist and sustain recovery.

### **Action area 3 – Supporting Families**

This action area aims to reduce the risk of harm to children and adult as a consequence of the substance misuse behaviour of a family member e.g. a parent, partner, adult relative or a child. We see this action area as being crucial to supporting the delivery of the Welsh Assembly Government's child poverty and domestic abuse strategies.

### **Action area 4 - Tackling Availability and protecting Individuals and Communities**

This action area aims to reduce the harm caused to individuals and communities by substance misuse related crime and anti social behaviour by tackling the availability of illicit drugs and the need to manage the availability of alcohol and other substances, including the sale of alcohol or solvents to young people.

This plan will be reviewed periodically/annually to assess any changes relating to substance misuse and the effectiveness of our actions regarding the situation and will be adapted accordingly.
